Summary (Week 5):

In Week 5, our team made significant progress in building the core structure and functionality of our GHURBO-Travel project. We worked collaboratively on multiple parts of the application, ensuring a functional and visually appealing front-end with proper routing and authentication.

Work Completed:

1. Project Creation:

- Initialized the GHURBO-Travel project using Vite with React and JavaScript.

2. Navigation Bar:

- Designed and implemented a responsive navigation bar using Tailwind CSS and help of prebuiltui.com.
- Included links to Home, Tour List, and User Profile/Login.

3. Home Page:

- Created an engaging landing page for the application.

Class 4 - Weekly Update Report

- Displayed introductory content and visuals related to travel and tourism.

4. User Authentication with Clerk:

- Integrated Clerk for user authentication and session management.
- Set up login, registration, and user profile functionalities.
- Applied route protection for authenticated pages.

5. Tour List Page:

- Developed a dynamic page to display all available tours.
- Used dummy JSON data for displaying tours as cards with basic information.

6. Tour Details Page:

- Created a dedicated page for each tour.
- Displayed detailed information including title, description, location, and images.
